ZSK Sprint 5

Brand: ZSK
Product Code: ZSKSPRINT5
Availability: 100

Short Description

Description
The ZSK SPRINT 5 generation machines are equipped with the ZSK's intermediate tubular arm which was the first slimmed down tubular arm available for the embroidery industry. This tubular arm enables embroidery at a minimum of neccessary space. At up to1200 stitches per minute as-well as a optimum running speed of 950 stitches per minute this ZSK will leave everything else in it's wake

Embroidery Field
With a usable embroidery field of maximal 460 x 310 mm, the SPRINT 6 model offers the perfect dimensions for individual embroideries of private end customers, personalized embroidery orders of the advertising industry, and creative embroidery designs for fashion.

Creative Variety
The machines of the sprint series have at command multiple application and expansion capabilities for all standards and fields of use.

Your customers make further demands on your range of services in addition to the usual tasks like name tags and company logos? You develop new embroidery ideas to enlarge your product range and to solidify your business success?

Our embroidery machines of the SPRINT series provide besides prime embroidery quality many additional devices and frames which assist you working up and realizing your creative potential as well as to make sure that your customers requirements lead to success for your business.

Mobility

Solid construction and highest quality of material built together with comparably low weight are optimal prerequisites to employ the SPRINT not only stationary in shops or studios, but also on fairs, markets, or sports and marketing events.
